**TO WHOMSOEVER IT MAY CONCERN**

This is to certify that we have installed e-plant software, designed and delivered by M/s Indus Business systems Limited, Hyderabad for DCS integration with PC through LAN & is web enabled with 20 user licenses. This has been working successfully from 01/06/02 to our satisfaction.

We have procured E-plant for the following purposes:

1. To capture the data of around 300 Tags from Honeywell TDS 3000 DCS into a RDBMS database on 1 to 5 minute interval basis and to provide the required information to from DCS to the concerned users through a web-enabled Intranet on the LAN.
2. To generate and send pop up messages and mails through Intranet for critical predefined process parameters to the concerned persons. This has to happen whenever DCS generates alarms for those parameters.
3. To provide justification of Alarms raised and the action taken.
4. To generate current and historic trend analysis for the selected parameters and for the selected time segments. The trend analysis should also be available in EXCEL formats.
5. To enable Paperless Office Management through the Intranet for Mail Management, Work Management, Document Warehouse etc.

E-Plant has met the above objectives and Indus showed utmost commitment in meeting those objectives. E-Plant is easy to use and has added immense value to our process management.

We congratulate Indus for their success on our project and wish them all the best in their future endeavours.

Yours truly,

**RAJESH KAPOOR**

(Asst.General Manager)
